iTunes 8 is officially available for downloading Apple servers. I'm not sure what to expect? Take a look at our first look iTunes 8. Take a look at this week the more awesomest. check-out downloads from LifeHacker: Ubuntu 11.04 BetaLinux Systems: the next version of the Ubuntu's Linux desktop, out of April 28, will actually read the next version of the Ubuntu's Linux desktop, out of April 28, will present some really large changes, including a new desktop shell that performs units, a "test drive" for the apps and a default installation of LibreOffice. Try it everything and see how it works with the public beta. The best way to try the beta is to load it on a USB stick for the no-install launch, we recommend unetbootin for that activity. Download the correct ISO (the X86 "desktop" option in most cases), connect your USB stick, then start UnetBootin and choose the option to manually point to an ISO.Dock4DROID (Android) Android: While Android allows you to Run more apps in the background, does not have the best sequel MoreWhile Android lets you run more apps in the background, it doesn't have the best way to quickly switch from the apps. Dock4DROID brings a swipable basin, not unlike iOS fast app switching, to your phone Android.gladinet (Windows) Windows: all receive free 5 GB in New Cloud Drive of Amazon, and those who buy any album MP3 GetÃ € ,~ | GB free in the new Amazon cloud guide, and those who buy any MP3 album get 20 GB. Make more than that web space with the Gladinaet Cloud desktop, which has just updated to support the cloud drive and integrate it as a folder connected to the network. Macalendarbar (Mac) Mac OS X: CalendarBar is a men's utility that stores calendars in your Mac OS X Read Morecalendarbar is a really useful menu utility that stores calendars in your Mac OS Xubar winery. Synchronizes with Google Calendar, works with iCAL and even Facebook QuickSync (Windows) Windows: QuickSync is a minimum synchronization tool that lives in your system pan, allowing you ... Istagrıcı PIA™ QuickSync is a minimum synchronization tool that He lives in your tray system, allowing you to return it quickly and start synchronizing your data. To start, everything you need to do is drag and release a folder on its main window. Android Music Player (Android) Android: A new version of the Android market is leaked on the web today containing a new music ... more the version of the Android market is leaked on the web today containing a new stable music player to use. The new sports playback reader an improved interface, a recent listening story and some clean touch commands. The updated reader also adds the functionality for cloud-based streams - not yet available. Shower Data Recovery (Windows) only Windows: if you managed to delete important photos, crush a partition, or otherwise go ... Contractive six Successful to delete important photos, crush a partition, or otherwise go to clean the data you shouldn't add, add the free minitool data recovery app to your list of the last resorts. It is a powerful tool to find data on Windows systems, working or otherwise. Meach Snap (iOS) Snap Snap is an orderly application that photographs your food, loads the picture, then responds with A ... Lead Moremeal Snap is an ordered application photographs your food, loads the image e Then he responds with a caloric count in seconds. And it works surprisingly well.minimalist Facebook (Chrome) Chrome: Facebook was seriously cluttered over the years, and if you would like to tonify it in down ... Read the Morefacebook you are cluttered over the years, and if you would like to tone it by removing, say, the group button, the message drop-down menu or ads, minimalist for Facebook will allow you to change it to your liking. Firefox (Firefox 4+, Windows) Firefox 4+ (Windows only): Usually, the Look editing of your Firefox browser requires a CSS tweak, anÃ € ,~ | Inappropriate contours, changing the Firefox browser look requires a CSS tweak, CSS, Information: Configuration switch or specialized downloads. Stratiform is an all-in-one add-on that offers a variety of buttons, toolbar and other visual element switches. Try new themes and turn back on without any Hassle.E4RAT (Linux) Linux: If your computer leaves you already quickly enough or looking to echare a little extra spice ... Looking up your computer already quickly enough or looking eke Some extraordinary broken your old computer, the free E4RAT command line tool reduces your startup time seriously. Take a look at our article on how to get it configured on your PC.let us know if you think you've lost any "must-see" download this week in the comments below! Selected binary distributions are provided to simplify the installation of the most complicated parts of BSOFT. In particular, the support of the FFTW3 library and threading (OpenMP or Grand Central Dispatch) is included in distributions. In most cases bsoft has been compiled against TCL / TK 8.5. These distributions dislike in a directory called "bsoft" (it is not necessary to compile). To complete the installation, make sure that environmental variables are set correctly to indicate the BSOFT programs and library. See below for the source code that can be completed on any Unix flavor. Old versions of old versions of bsoft are provided for those who have developed the code based on those. New versions The most recent versions than the current main release can be found here. These distributions are not necessarily completed and must be disattapped within an existing bsoft directory. Supported platforms Linux (I386 / I686, X86 64, PowerPC, Alpha, Itanium) Darwin or MacOSX (PowerPC, Intel) IRIX64 (SGI) Solaris (Sole) AIX (IBM) VMS OSF1 or Tru64 (Alpha) VMS (Alpha) Cygwin\_Nt (Windows NT) In principle the package could be completed on any UNIX-based operating system. Mac OS X requirements: Mac OS X default installations have not installed compilers. Download XCode from the Developer Apple website and install it before: Note that Mac OS X XCode versions must be combined with different operating systems: Mac OS X 10.4 (Tiger): Xcode 2.5 Mac OS X 10.5 (Leopard): Xcode 3 Mac OS X 10.6 (Snow Leopard): Xcode 3 Mac OS X 10.7 (Lion): Xcode 4 Mac OS X 10.8 (mountain lion): Xcode 4 Mac OS X 10.9 (Mavericks): Xcode 5 Mac OS X 10.10 (Yosemite): Xcode 6 Mac OS X 10.11 (El Capitan): Xcode 7 Mac OS X 10.12 (Sierra): Xcode 8 Mac OS X 10.13 (Sierra): XCode 10 The Z library: the inclusion of the PNG format in BSOFT requires the compression lib. The requested files are: /usr/include/zlib.ho /usr/local/include/zlib.h /usr/lib/libz.\* (like libz.ao libz.so) on some versions of Unix and VMS, libz could Don't be available, so it's included in the distribution and will be completed. TCL / TK: BSOFT is mainly a command line package, with all the necessary code included in the package. However, from version 0.9, includes a TCL / TK interface and a TCL / TK / BSHOW script, useful for viewing images and some interactive manipulations (not available for VMS). The TCL / TK version must be 8.3 or higher. BSOFT can be completed without TCL / TK (see below for details). On most UNIX boxes, TCL / TK headers and libraries are installed in /usr or /usr/local (search /err/include/tk.h or /usr/local/include/tk.h). Linux distributions generally have separate packages for Runtime versions and TCL / TK developer. Both must be installed to be able to use the BSHOW. The BSOFT configuration script, BConf, tries to automatically find the TCL / TK. Make sure the TCL / TK version is 8.3 or higher. Make sure the "TCL" and "Wish" commands are in your route executable. XML: The default format for parameter files is the star format. These can also be written in an XML format, but requires the libxml2 library with its header files. Common positions for header files are in /usr/include/libxml2 and the library in /usr/lib. The source code for this library is not included in Because of its pure dimension. Improvements These improvements are optional and can be included during compilation. OpenMP: Different bsoft operations were parallelized with OpenMP. Support for OpenMP was part of GCC as Version 4.2 and platforms such as Mac OS X (first 10.7) and Linux support it. Grand Central Dispatch: On Mac OS X 10.7 and then, the compiler has been changed to Clang that does not support OpenMP. In Stead, threading is done using Grand Central Dispatch. FFTW3: Due to the complexities in the new versions of FFTW (3.x), it is no longer included in the bsoft distribution. It should be filled in as a single precision floating point with support for OpenMP activated if parallel operations are also desired. DevCan is a Microsoft Windows application and can only be used on a Mac in combination with a Windows emulator. Before downloading DevCan version 6.7.9, you need to read and sign the conditions of use of use below and complete the registration form. After completing the form you will receive an e-mail with a connection to the software download. The download link runs after 24 hours. If your link has expired, request a new one using the already registered? module. Thank you for the interest in using the DevCan statistical software and associated databases, used to calculate (using a vital format) the probability of being diagnosed or dying cancer from birth or conditional to a certain age. More information about DevCan can be found on . Please note the following terms carefully. Provider: the "recipient" of the National Cancer Institute, the part that receives software materials from the supplier within this "Software" agreement: an interactive version based on the GUI of DevCan, a statistical software program developed by IMS, Inc. Under contract for the NCI/ITHE provider and the recipient I agree as follows: The recipient agrees not to try to reverse the engineer the software. The recipient agrees to comply with all federal regulations applicable to research projects and research material management. The software will not be used by the recipient as an agent, device or treatment tool or intervention in research with human subjects in which such use would require the approval of an institutional review commission. The recipient agrees not to use the software for diagnostic purposes in human subjects. If the recipient wishes to sell your business software that incorporates the software or use software for purposes or applications (including consultation), the recipient will contact the transfer center of NCI technology (ATTENTION: TECHNOLOGICAL TRANSFER Manager for the NCI Division of Control Cancer and population sciences) on nciectransfer@mail.nih.gov. The title in the software must remain with the supplier. It is understood that nothing present is considered made up of implications or otherwise, the granting of both parties by any other license or other rights in any patent, patented application or other intellectual property right or interest. The supplier reserves the right to distribute the software to others and use it for supplier purposes. The recipient agrees that one of his publications or presentations that use this software include the appropriate recognition of the software provider's contribution and will include the quote found at: . The supplier and the recipient each maintain, except for the applicable laws, the title of any patent, copyright, trademark or other intellectual property of the respective employees developed or created using the NA © Supplier NA © recipient promise in advance for the inventions developed under this Agreement. If the recipient creates an invention containing the software ("invention of the recipient") and wishes to patent the invention of the recipient, the recipient agrees to notify the supplier of the recipient's invention before the protection of patent protection and to work in good Faith faith The supplier to determine the inventive contributions of the recipient and the supplier. In the event that the recipient wishes to distribute an invention of the recipient to third parties, the recipient will ensure that the third party is notified by the presence of the software and the supplier's rights in it. Software comes as is, without any accompanying service or improvement from the supplier. The software is provided to the recipient without guarantees, expressed or implicit, including any guarantee of marketability or suitability for a particular purpose. The supplier does not represent that the use of the software does not violate any patent or property rights of third parties. The supplier does not approve the results of any analysis derived from the use of the software and the recipient agrees not to request the approval of these results and analysis of the Supplier or government of the United States. The recipient agrees not to describe the statistical calculations conducted in the absence of Devcan as if they had been calculated by DevCan.Recipient represents and guarantees that the official accepts this agreement is authorized to do so. If you are already registered but you need another link to download the software, enter your e-mail address below. under.
